CKLB 5000 WATTS DAY and NIGHT
DIAL 1350 OSHAWA ONT.

CARTB MEMBER

October 3, 1956.

Mr. R. B. Schiller,
30 Park Avenue,
AVENEL, New Jersey,
U.S.A.

Dear Sir :

We are pleased to verify your reception of CKLB on 1350 k/cs on August 10, 1956. Your program listing corresponds with our schedule for that date.

In reply to your questions, CKLB is located about thirty miles from Toronto and seventy five miles north of Crystal Beach. We are working a five thousand watt Collins transmitter into a five tower array and have been of 1350 k/cs for about one year and a half. This array enables us to broadcast in a highly directional pattern after sundown....roughly speaking, we beam east-west during the day, and north at night.

Thank you for your interest in our operation.

Sincerely yours,

THE LAKELAND BROADCASTING CO. LTD.,

Reg McCausland.

RMcC/GA

Reg McCausland,
Asst. Technical Director.
